SUMMARY................................................

Highland’s three new elementary schools are well into construction, and the buildings are taking shape this fall. Each school will feature a park-like setting and floor plans include a cafeteria with a stage, gymnasium and classrooms with extended learning areas allowing instructional flexibility for years to come.

ELEMENTARY SCHOOL PROGRESS............

At Granger Elementary, bearing masonry is complete and a large portion of the on-grade concrete slab, metal roof deck and structural steel is complete. The construction crews are currently working on installing light-gauge metal trusses and exterior structural stud framing as well as exterior brick veneer. The team is also in the beginning stages of roof installation, interior wall framing, interior plumbing, HVAC and electrical.

At Hinckley Elementary the majority of underground electric and plumbing utilities have been completed. The team is continuing with on-grade concrete slab and bearing masonry, and site utilities. Lastly, structural steel will be installed throughout the month of September.

At Sharon Elementary, concrete foundations are nearly complete and the team is continuing to work on above and below grade masonry. A large portion of the underground plumbing and electrical is installed and will continue through the month of September. In addition, many of the site utilities, including fire mains, water mains, electrical, technology, and storm installation are well underway.

HIGHLAND MIDDLE SCHOOL UPDATE......

Meanwhile, at the Middle School, the Hammond team has completed the interior duct work and ceiling replacements mentioned last month. The current focus is on electrical rough-ins that will support the new mechanical equipment, including air conditioning.
