SUMMARY................................................
Highland’s three new elementary schools are well into construction and continue to take shape this fall. Each school will feature floor plans that include a cafeteria with a stage, gymnasium and classrooms with extended learning areas allowing instructional flexibility for years to come.

ELEMENTARY SCHOOL PROGRESS.........
At Granger Elementary, roofing systems have been completed and metal roof trusses and metal roof decking are currently being installed. On the exterior of the building, you can see framed walls and sheeting as well as brick veneer. Inside the building, we are adding insulation, metal stud walls, electrical, plumbing and HVAC rough-ins as well as setting the main mechanical equipment in place.

At Hinckley Elementary, construction crews are currently working on pouring concrete slab on grade, laying masonry CMU walls, completing underground electrical and plumbing rough-ins, setting large mechanical equipment and preparing for roofing installation. They have also completed the installation of stone parking areas, topsoil spreading and lawn seeding. In addition, they are preparing for the installation of a new waste water treatment plant.

At Sharon Elementary, work is being completed on underground electrical and plumbing rough-ins, pouring concrete slabs on grade, building masonry CMU walls, and beginning structural steel erection. The team is also preparing to frame exterior walls this month and have recently completed the stone parking lot areas, electrical site utilities, and phase one of water site utilities.

HIGHLAND MIDDLE SCHOOL UPDATE......
Highland Middle School is currently occupied by students for the duration of the 2020-21 school year. Construction has slowed down at this time, but will pick up when the school year is completed in the summer of 2021.

CONTACT:
If you have any questions or concerns about any construction activities, please feel free to contact Construction Manager Joe Swantek at 330-495-5225.
